Class 1

Class 1 have dived straight into their new topics after the holidays. In maths they have been naming and sorting 3D shapes. Our new science topic is materials. The children have been identifying the material an object is made from and sorting them accordingly. In English we have been exploring the differences between fiction (story) and non-fiction books (not a story). We then looked at a range of non-fiction books and identified some of their features, such as, contents pages, index, pictures and headings.
